No part of this publication may be reproduced or transmitted in any form or by any means, electronic or mechanical, including photocopy, recording, or any information storage and retrieval system, without permission in writing from the copyright owner.

The appearance of the code at the bottom of the first page of an article in this journal indicates the copyright owner's consent that copies of the article may be made for personal or internal use, or for the personal or internal use of specific clients. This consent is given on the condition, however, that the copier pay the stated per copy fee through the Copyright Clearance Center, Inc. (21 Congress Street, Salem, Massachusetts 01970), for copying beyond that permitted by Sections 107 or 108 of the U.S. Copyright Law. This consent does not extend to other kinds of copying, such as copying for general distribution, for advertising or promotional purposes, for creating new collective works, or for resale. Copy fees for pre-1984 articles are as shown on the article title pages; if no fee code appears on the title page, the copy fee is the same as for current articles.

CONTENTS OF VOLUME 35

NUMBER 1, OCTOBER 1984

WILLIAM JONES AND JOHN GAMBLE. Epidemiological-Environmental Study of Lead Acid Battery Workers. I. Environmental Study of Five Lead Acid Battery Plants.	1
JOHN GAMBLE, WILLIAM JONES, AND JOHN HANCOCK. Epidemiological-Environmental Study of Lead Acid Battery Workers. II. Acute Effects of Sulfuric Acid on the Respiratory System.	11
JOHN GAMBLE, WILLIAM JONES, JOHN HANCOCK, AND RICHARD L. MECKSTROTH. Epidemiological-Environmental Study of Lead Acid Battery Workers. III. Chronic Effects of Sulfuric Acid on the Respiratory System and Teeth.	30
SARASWATI BULUSU AND INDIRA CHAKRAVARTY. Augmented Hepatic Susceptibility to Malathion Toxicity in Rats on Low-Protein Diets.	53
R. J. CYR AND R. L. BERNSTEIN. Morphological Changes and Depressed Phagocytic Efficiency in <i>Dictyostelium</i> Amoebae Treated with Toxic Concentrations of Cadmium.	66
ALAN T. COCKS AND W. JOHN MCELROY. Modeling Studies of the Concurrent Growth and Neutralization of Sulfuric Acid Aerosols under Conditions in the Human Airways.	79
J. D. LUTTON, N. G. IBRAHAM, M. FRIEDLAND, AND R. D. LEVERE. The Toxic Effects of Heavy Metals on Rat Bone Marrow <i>in Vitro</i> Erythropoiesis: Protective Role of Hemin and Zinc.	97
KENNETH DONALDSON, J. M. G. DAVIS, AND KEITH JAMES. Asbestos-Activated Peritoneal Macrophages Release a Factor(s) Which Inhibits Lymphocyte Mitogenesis.	104
GUY HUEL, RICHARD B. EVERSON, AND ISABELLE MENDER. Increased Hair Cadmium in Newborns of Women Occupationally Exposed to Heavy Metals.	115
T. E. CODY, M. J. RADIKE, AND D. WARSHAWSKY. The Phototoxicity of Benzo[a]pyrene in the Green Alga <i>Selenastrum capricornutum</i>	122
DEAN SHEPPARD, WILLIAM L. ESCHENBACHER, AND JOHANNA EPSTEIN. Lack of Bronchomotor Response to Up to 3 ppm Formaldehyde in Subjects with Asthma.	133
DOUGLAS J. KORNBRUST AND GARY E. HATCH. Effect of Silica and Volcanic Ash on the Content of Lung Alveolar and Tissue Phospholipids.	140

M. H. MOSTAFA, E. A. EL-BASSIOUNI, S. M. EL-SEWEDY, S. AKHNOUK, T. TAWFIC, AND A. ABDEL-RAFEE. Hepatic Microsomal Enzymes in <i>Schistosoma mansoni</i> -infected Mice: I. Effect of Duration of Infection and Lindane Administration on Dimethylnitrosamine Demethylases.	154
CAROL R. ANGLE, ALLAN MARCUS, I-HUI CHENG, AND MATILDA S. MCINTIRE. Omaha Childhood Blood Lead and Environmental Lead: A Linear Total Exposure Model.	160
JAMES D. TUCKER, WEN-ZONG WHONG, JING XU, AND TONG-MAN ONG. Genotoxic Activity of Nitrosated Coal Dust Extract in Mammalian Systems.	171
K. M. MUNIR AND S. V. BHIDE. Deviations in Ornithine-Related Metabolism during Hexachlorocyclohexane-Induced Hepatocarcinogenesis in Mice: Evidence for Conversion of Glutamate to Ornithine.	180
ROBERTA A. MITTELSTAEDT AND JOEL G. POUNDS. Subcellular Distribution of Lead in Cultured Rat Hepatocytes.	188
HIROKAZU TSUBONE, AKIRA K. SUZUKI, MASARU SAGAI, AND SHIGERU SUGANO. Changes of Cardiac and Respiratory Rhythm in Non- and Tracheostomized Rats Exposed to Nitrogen Dioxide.	197
JOAN M. CRANMER, MORRIS F. CRANMER, AND PHILLIP T. GOAD. Prenatal Chlordane Exposure: Effects on Plasma Corticosterone Concentrations over the Lifespan of Mice.	204
ALFRED P. WEHNER, CONNIE L. WILERSON, AND DONALD L. STEVENS. Lung Clearance of Neutron-Activated Mount St. Helens Volcanic Ash in the Rat.	211
MOTOHIKO MURAMATSU, SETSUKO UMEMURA, TAKASHI OKADA, AND HIDEO TOMITA. Estimation of Personal Exposure to Tobacco Smoke with a Newly Developed Nicotine Personal Monitor.	218
P. MEDOŃ, U. TLATLIK-NOWAK, AND A. SIDOROWICZ. Growth Rate of the Bacterium <i>Sphaerotilus natans</i> in Lead-Containing Medium and the Effect of Calcium Ions.	228
S. K. TANDON, V. K. JAIN, AND A. K. MATHUR. Effect of Metal Chelators on Excretion and Tissue Levels of Essential Trace Elements.	237
KRISTAN A. L'ABBÉ AND JOHN R. HOEY. Review of the Health Effects of Urea-Formaldehyde Foam Insulation.	246
K. KOSTIAL, B. KARGAČIN, M. BLANUŠA, AND M. LANDEKA. Lower Efficiency of DTPA in Reducing Cadmium Retention in Suckling Rats.	264
BATIA LAVIE, EVIATAR NEVO, AND URI ZOLLER. Differential Viability of Phosphoglucose Isomerase Allozyme Genotypes of Marine Snails in Nonionic Detergent and Crude Oil-Surfactant Mixtures.	270

YASUNOSUKE SUZUKI AND NORIHIKO KOHYAMA. Malignant Mesothelioma Induced by Asbestos and Zeolite in the Mouse Peritoneal Cavity. 277

LANCE A. WALLACE, EDO PELLIZZARI, TY HARTWELL, MARTIN ROSENZWEIG, MITCHELL ERICKSON, CHARLES SPARACINO, AND HARVEY ZELON. Personal Exposure to Volatile Organic Compounds. I. Direct Measurements in Breathing-Zone Air, Drinking Water, Food, and Exhaled Breath. 293

MOHINI AWASTHI, PUNITA SHAH, M. S. DUBALE, AND PANKAJ GADHIA. Metabolic Changes Induced by Organophosphates in the Piscine Organs. 320

ERRATUM

Volume 33, Number 2, April 1984: F. Carvalho, Tania M. Tavares, Sandra P. Souza, and P. S. Linhares, "Lead and Cadmium Concentrations in the Hair of Fishermen from the Subae River Basin, Brazil," pp. 300-306 326

NUMBER 2, DECEMBER 1984

ALY H. MOHAMED AND MICHELE S. STERN. Induced Recessive Lethals in the Second and Third Chromosomes of *Drosophila* Fed on Fly Ash 327

WILLIAM J. SWARTZ. Effects of 1,1-Bis(*p*-chlorophenyl)-2,2,2-trichloroethane (DDT) on Gonadal Development in the Chick Embryo: A Histological and Histochemical Study 333

KENNETH B. ADLER, BROOKE T. MOSSMAN, GREGORY B. BUTLER, LUCIE M. JEAN, AND JOHN E. CRAIGHEAD. Interaction of Mount St. Helens' Volcanic Ash with Cells of the Respiratory Epithelium. 346

ROSE M. MORGAN, YASHDEV R. KUNDOMAL, AND EUGENE W. HUPP. Interaction of Cadmium Chloride and γ Irradiation on Blood Parameters of the Young Adult Rat 362

SUSAN G. SHAMI, STEVEN A. SILBAUGH, FLETCHER F. HAHN, WILLIAM C. GRIFFITH, AND CHARLES H. HOBBS. Cytokinetic and Morphological Changes in the Lungs and Lung-Associated Lymph Nodes of Rats after Inhalation of Fly Ash 373

WILBERT S. ARONOW, WILLIAM J. SCHLUETER, MARK A. WILLIAMS, MARLENE PETRATIS, AND MICHAEL H. SKETCH. Aggravation of Exercise Performance in Patients with Anemia by 3% Carboxyhemoglobin 394

HIDEKAZU FUJIMAKI, SHINJI TAKAHASHI, MASASHI OZAWA, MASATAKA MURAKAMI, HIROSHI TAKAHASHI, AND KENTARO KUBOTA. Enhancement of Antibody Response in Japanese Quails by Acute NO₂ Exposure 399

THOMAS F. GALE. The Amelioration of Mercury-Induced Embryotoxic Effects by Simultaneous Treatment with Zinc	405
JO ELLEN HOSE AND HAROLD W. PUFFER. Oxygen Consumption Rates of Grunion (<i>Leuresthes tenuis</i>) Embryos Exposed to the Petroleum Hydrocarbon, Benzo[a]pyrene	413
ERIK TRELL, LARS JANZON, RONALD W. PERO, CARL BRYNGELSSON, TOMAS BRYNGELSSON, AND ROLF KORSGAARD. Mutagen Sensitivity, Smoking Habits and Enzyme Induction in Healthy Middle-Aged Men	421
WILLIAM ABRAHAM, GILLETTE A. CHAPMAN, AND BRUCE MARCHETTE. Differences between Inhaled and Intravenous Carbachol in Detecting O ₃ -Induced Airway Effects	430
M. F. SULLIVAN, B. M. MILLER, AND J. C. GOEBEL. Gastrointestinal Absorption of Metals (⁵¹ Cr, ⁶⁵ Zn, ^{95m} Tc, ¹⁰⁹ Cd, ¹¹³ Sn, ¹⁴⁷ Pm, and ²³⁸ Pu) by Rats and Swine	439
CHRISTIAN E. GRUE AND BRYON K. SHIPLEY. Sensitivity of Nestling and Adult Starlings to Dicrotophos, an Organophosphate Pesticide	454
W. F. M. O. HOLTERMAN, P. DE VOOGT, AND J. H. J. COPIUS PEERBOOM-STEGEMAN. Cadmium/Zinc Relationships in Kidney Cortex and Metallothionein of Horse and Red Deer: Histopathological Observations on Horse Kidneys	466
HEATHER E. ROSE AND JOHN QUARTERMAN. Effects of Dietary Phytic Acid on Lead and Cadmium Uptake and Depletion in Rats	482
HIDEKAZU FUJIMAKI, MASASHI OZAWA, TORU IMAI, AND FUJIO SHIMIZU. Effect of Short-Term Exposure to O ₃ on Antibody Response in Mice	490
RONALD F. DODSON, TOMOTOSHI AKEMATSU, MARION GLENN WILLIAMS, JR., JOAN O. FORD, AND GEORGE A. HURST. The Influence of Amosite Asbestos Exposure on Lung Permeability	497
NAOKI SUGAWARA AND CHIEKO SUGAWARA. Comparative Study of Effect of Acute Administration of Cadmium and Silver on Ceruloplasmin and Metallothionein: Involvement of Disposition of Copper, Iron, and Zinc	507
GONDI S. RAO, K. KANNAN, S. K. GOEL, K. P. PANDYA, AND RAVI SHANKER. Subcutaneous Kerosene Toxicity in Albino Rats	516
JANET H. KACZENSKI AND WILLIAM H. HALLENBECK. Migration of Ingested Asbestos	531
ANNOUNCEMENTS	552
AUTHOR INDEX FOR VOLUME 35	554
CUMULATIVE SUBJECT INDEX FOR VOLUMES 33-35	556

INSTRUCTIONS TO AUTHORS

Manuscripts. Papers may represent original research in any of the disciplines now concerned with man-environmental relationships; it is anticipated that the relevance of the findings to broad problems of environmental biology and environmental medicine will be considered. Analytical and integrative reviews are equally eligible. The editorial emphasis of the Journal is on research concerning health effects of environmental alterations, broadly considered; engineering and control efforts are well served elsewhere.

Selected Book Reviews will be included.

Submission of Manuscripts. These should be submitted in duplicate to any member of the Board of Editors or to ENVIRONMENTAL RESEARCH, Editorial Offices, Environmental Sciences Laboratory, Mount Sinai School of Medicine, Fifth Avenue and 100th Street, New York, New York 10029. Further, prior review of the paper may be undertaken with a member of the Board of Consulting Editors, especially one with particular competence in the area concerned (as, environmental physiology, epidemiology and biostatistics, ecology, occupational medicine, toxicology, anthropology, climatology, air pollution, environmental medicine, geophysics, etc.); this will often expedite consideration of the paper.

Original papers only will be considered. Manuscripts are accepted for review with the understanding that the same work has not been and will not be published nor is presently submitted elsewhere, and that all persons listed as authors have given their approval for the submission of the paper; further, that any person cited as a source of personal communications has approved such citation. Written authorization may be required at the Editor's discretion. Articles and any other material published in *Environmental Research* represent the opinions of the author(s) and should not be construed to reflect the opinions of the Editor(s) and the Publisher.

Authors submitting a manuscript do so on the understanding that if it is accepted for publication, copyright in the article, including the right to reproduce the article in all forms and media, shall be assigned exclusively to the Publisher. The Publisher will not refuse any reasonable request by the author for permission to reproduce any of his or her contributions to the journal.

All papers will be published in English. It is preferable that papers be submitted in English to ensure faithfulness to the author's meaning. If necessary, however, a translation will be arranged.

Form of Manuscript. Manuscripts should be typewritten (not mimeographed) with double or triple spacing and wide margins on high quality bond paper. Subdivision of the article into *Abstract* (50–200 words), *Introduction*, *Materials and Methods*, *Results*, *Discussion*, *Acknowledgments* and *References* is recommended. However, variations of this format are acceptable if they provide clearer expression of the subject. In addition, section headings are often useful.

The first page of the manuscript should contain the article title, author's name, and affiliation (include zip code where applicable). The second page should contain a proposed running head of fewer than 40 characters and the address of the person to whom proofs are to be sent. In the upper left-hand corner of each following page (including Reference pages, Tables, etc.) please type a shortened form of the title and the surname of the senior author. Please also number each of these pages.

Abbreviations. Follow the usage established by *Chemical Abstracts*. If others are utilized define on first use.

Figures and Tables. Number all figures consecutively with arabic numerals; legends should be typed together on a separate sheet. Lettering on the original figures should be large enough to take a reduction of 50–60 per cent. Graphs should be plotted with black India ink on light blue coordinate paper, no larger than $8\frac{1}{2}'' \times 11''$; grid lines that are to show in the engraving should be inked in black. Photographs should be glossy prints ($5'' \times 7''$ or $8'' \times 10''$) with strong contrasts. X-rays should be right-reading glossy prints. Providing an overlay that indicates the most critical areas of halftones will aid in ensuring high quality reproduction.

Tables are to be typed on separate pages and numbered with arabic numerals; a table title should be included.

Footnotes. Footnotes in the text are identified by superscript *numerals* and listed on a separate sheet; in the *tables* by superscript *letters* and placed at the bottom of the table.

References. These are to be cited in the text by the author's name and year of publication. References should be listed alphabetically at the end of the paper in the following order:

Curry, A. S. (1963). Acidic and neutral poisons. In "Progress in Chemical Toxicology" (A. Stolman, Ed.), Vol. 1, pp. 135-155, Academic Press, New York.

Waller, R. E., Commins, B. T., and Lawther, P. J. (1965). Air pollution in a city street. *Brit. J. Industr.* 22, 128-138.

The names of journals should be abbreviated according to *Index Medicus*, 1980, or *Chemical Abstracts Service Source Index*, 1980. Include in the reference list articles that are "in press," but incorporate in the text or use footnotes for "manuscript in preparation," "personal communication," or "unpublished observations."

Reprints. A reprint order form will accompany galley proofs. The senior author receives 50 reprints free of charge, and additional copies may be ordered.

Correspondence. Editorial communications should be addressed to ENVIRONMENTAL RESEARCH, Editorial Offices, Environmental Sciences Laboratory, Mount Sinai School of Medicine, Fifth Avenue and 100th Street, New York, N.Y. 10029. Correspondence and information concerning subscriptions should be addressed to Academic Press, Inc., Journal Subscription Department, 111 Fifth Avenue, New York, N.Y. 10003. Correspondence concerning manuscripts in production and proofs should be addressed to Academic Press, Inc., Journal Production Department, 1250 Sixth Avenue, San Diego, Calif. 92101.
